

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 4, between lines 20-24 of the specification with the following:

A further example of an a liquid crystal display device with polymer network is the so called Axially Symmetric Mode for wide viewing angle liquid crystal display devices and plasma addressed liquid crystal display devices, where pixels are individually encapsulated using a polymer network. Again, this polymer network could be provided with pressure dependent resistivity to enable touch sensing.
